

Technical Bulletin TB/009/2026

This Technical Bulletin has been compiled to draw your attention to the requirements related to “Minimum Energy Performance Standards” (MEPS).

In South Africa, the specific MEPS for electric motors is defined by the National Regulator for Compulsory Specifications Act, (Act 5 of 2008) and VC 9113 Regulation which came into effect June 2025.

The requirements contained in VC 9113 appear to be applicable to both new and replacement of electrical motors.

NRCS VC 9113 is attached as a separate document to this technical bulletin.

Further information can be obtained from the local electric motor importers/suppliers/agents.

This Technical Bulletin has been compiled by the Technical Advisor to the SACGA 12th January 2026.
